NETWORK VISIBILITY

....a feature not a pain!
NETWORKS AS-IS

Customer perspectives:
✓ My Network throughput is very good, we have just upgraded our backbone to a 40Gbs....
✓ We have a Back-to-Back firewall architecture that are best of bred since six years....
✓ We check every single object with a the best of the market network monitoring solution....
CHALLENGE

Some easy questions:
✓ Are you able to see who is using your internet bandwidth just in time?.
✓ Have you some old systems running on your network?
✓ Have you never thought that your perimeter firewall rules are to open?
REAL ANSWERS WITH REAL NEEDS

✓ Bandwidth Usage.
✓ Flows behavior.
✓ Network Protocol Assessment.
✓ Network Application Impact.
✓ Cloud Service Usage.
✓ Network Metrics.
✓ New Security Perspective.
✓ Intuitive GUI.

.. Visibility
PAINS

✓ Poor or Blind Visibility.
✓ No Compliances views.
✓ No Cloud Impact Analysis.
✓ Historical data with bugs.
✓ No Alerting on traffic flow behavior.
✓ No Teamwork with Networking Devices.
✓ Difficult Packet Analysis.
FEATURE

✓ Enhanced Traffic Flow Visibility (Nord-South and East-West).
✓ Traffic Compliances (SMBv1, Telnet, ).
✓ Performance Metrics (Throughput, Latency, Cloud App Impact).
✓ Bug Free Historical data (near second visibility).
✓ Proactive Alerting (Flooding, Performance and behavior Triggers ).
✓ Deep Analysis (PCAP analysis).
✓ Data Flow and Location results (SNMP).
✓ Strategical Analysis (Trending, bandwidth usage predictions, etc).
✓ Security Analytics (SSL Connection, Blacklisted flow, Flooding, DGA).
WHO NEEDS NTOPNG

✓ Field System Engineers
✓ All the Customers
✓ Security Engineers
✓ Consultants
✓ NOC/SOC
✓ Curious... and passionate

..and the best consultants for perfect integration!
